PROFESSIONAL SUMMARY

Computer Engineering graduate with experience in full-stack development, backend engineering, AI-powered applications, RESTful APIs, and SQL databases. Experienced collaborating in Agile teams to build scalable software solutions from design through testing and deployment.

WORK EXPERIENCE

CUBEWORKS TECHNOLOGY CONSULTING AND SOLUTIONS, INC.

Software Engineering Intern

Cebu City, Cebu
March 2026 – June 2026

- Developed a full-stack Python and React application for AI-assisted image processing, OCR, and structured data extraction, improving handwritten medical prescription interpretation accuracy by 30%.
- Designed backend workflows and RESTful APIs to process handwritten prescription data, validate extracted information, and support reliable downstream system integration.
- Optimized AI model training and data-processing workflows using Google Colab and CUDA, reducing training time by 25% while improving recognition performance for complex handwritten medical terminology.

PROJECTS

HUNT BUDDY | AI Job Application Tracker

2026

- Designed and developed a cloud-hosted full-stack web application using Next.js, React, TypeScript, Tailwind CSS, Supabase, and Vercel, implementing authentication, CRUD operations, RESTful APIs, and secure user management.
- Integrated AI-powered data extraction workflows and developed responsive application features for job tracking, structured data management, and user productivity.

OFFLINE LEARNING MANAGEMENT SYSTEM

2026

- Led the development of an offline-first Learning Management System using React, TypeScript, Node.js, RESTful APIs, and SQL databases featuring authentication, role-based access, course management, and assessments.
- Integrated a locally hosted database and supported lab-based validation with approximately 15 simultaneous users accessing the system over a local network.

USCERT I.T.C.H. (INVENTORY TRACKING AND CHECKING HUB)

2025

- Collaborated in an Agile development environment to design and develop an object-oriented Java inventory management system integrated with MySQL, implementing authentication, CRUD operations, transaction tracking, and relational database management.
- Implemented centralized transaction logging, secure admin access, and database-backed record management to improve traceability, reduce manual errors, and support data validation

EDUCATION

UNIVERSITY OF SAN CARLOS

BS Computer Engineering

Talamban, Cebu

2026

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, Software Development Life Cycle, Database Systems, Operating Systems, Web Development, and Machine Learning

ACTIVITIES

USC COMPUTER ENGINEERING COUNCIL

Council Member

Talamban, Cebu

Aug 2024 – June 2025

- Coordinated academic and department-wide student engagement events for the Computer Engineering council.
- Facilitated a technical workshop for over 30 students, coordinating technical setup, participant support, and event logistics in a collaborative team environment.

SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, C, HTML5, CSS3

Frontend: React, Next.js, Tailwind CSS, Vue.js

Backend: Node.js, FastAPI, REST APIs, JSON, Supabase

Databases & Cloud: PostgreSQL, MySQL, Firebase, Vercel

Tools: Git, GitHub, GitLab CI/CD, Linux (WSL), Docker (Fundamentals), Node-RED
